1966 Splitscreen Camper Van

Awesome, is a word that springs to mind when you see this camper, the colour is amazing and we love it. Due to it not being used, this van is now up for sale - lucky for somebody!

This bus has been slightly modified to cruise along looking cool. The gearbox has been replaced with a straight axle conversion kit which instantly lowers the back of the bus by 4 inches and improves the driving due to a better design. The engine has also been replaced, it now has a 1641cc lump in place and it pulls like a train. The front axle has been lowered with a disc brake conversion, and what with it's new set of shiny Fuchs, this is a real head-turner.

The interior has been revamped by us including all new upholstery, rock-n-roll bed, custom made wooden seating, table and overhead rear locker. We also fitted custom flooring, rear seatblets, 240V hook up, bonus charger and a 2nd battery system - this bus has it all and is ready to go.

It's been fully serviced and MOT'd, it comes with 12 months tax which is free due to it being tax exempt and has a 3 month warranty on the gearbox and engine.
