

Specification Sheet

1963 Ford Econoline Truck

This is one of the coolest retro trucks we've had here at VW Down Under. Imported from California last year, this baby is extremely solid, with no rust. Once she was settled here in the UK she was stripped down and repainted in her original colours, with some nice little details added like painted wheels and white wall tyres. She has an uncut dash and everything works. She starts on the button and

drives well with an original straight 6 cylinder petrol engine, she doesn't smoke and the gear change is great. This bus would make a perfect advertising vehicle for somebody, she comes fully UK registered, with 12 months mot and is tax exempt.

The first to see her will buy her. We haven't named this beauty yet so email us your suggestions!
